

**GENERAL DESCRIPTION**

FYC-Cu-SSZ13 is Cu-SSZ-13 Zeolite ,as a high silica CHA topological zeolite molecular sieve,and is used in Denitration catalyst etc.

**TYPICAL PROPERTIES**

|  |                           |
|--|---------------------------|
| Product item                                     | FYC-Cu-SSZ13              |
| SiO <sub>2</sub> /AL <sub>2</sub> O <sub>3</sub> | 12-35                     |
| Na <sub>2</sub> O,(wt%)                          | ≤0.5                      |
| Powder Form                                      | Singal Crystal cubic form |
| BET Surface area,m <sup>2</sup> /g               | ≥320                      |
| Lost of Ignition (wt%)                           | ≤5                        |
| D50(V)μm   | ≤10                       |
| Relative Crystallinity %                         | ≥90                       |

**Packing:**

10Kgs/15Kgs/20Kgs Plastic woven bag Or design by user request
