

**GENERAL DESCRIPTION**

FYC-SMO-20s is H-MOR Zeolite SAR 20, belongs to MOR structure, and is used in Catalyst, Dimethyl ether carbonylation, Toluene disproportionation, Xylene isomerization etc.

**TYPICAL PROPERTIES**

|  |                         |
|--|-------------------------|
| Product item                                     | FYC-SMO-20s             |
| SiO <sub>2</sub> /Al <sub>2</sub> O <sub>3</sub> | 15-25                   |
| Na <sub>2</sub> O, (wt%)                         | ≤0.05                   |
| Powder Form                                      | Singal Crystal Rod form |
| BET Surface area, m <sup>2</sup> /g              | ≥320                    |
| D50(V) μm  | ≤10                     |
| Relative Crystallinity %                         | ≥90                     |

**Packing:**

10Kgs/15Kgs/20Kgs Plastic woven bag Or design by user request
